Summary

B.Tech graduate in Artificial Intelligence Data Science with hands-on experience in AI/ML, Python, and Full Stack Development through industry internships and real-world software projects. Skilled in designing and developing AI-powered applications, scalable REST APIs, and end-to-end web solutions using Python, FastAPI, React.js, Node.js, MongoDB, and SQL. Strong foundation in Machine Learning, Data Structures Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Passionate about building intelligent, scalable, and production-ready software that solves real-world problems.

Education

Ramachandra College of Engineering, Eluru (JNTUK)

2022 – 2026

B.Tech in Artificial Intelligence and Data Science

CGPA: 7.5/10

Internships

Software Development Intern

Jan – Apr 2025

StudyOwl Education Pvt Ltd

- Developed REST APIs, authentication modules, and backend services using Node.js, Express.js, MongoDB, and Git, following modular software development practices.

Software Engineering Intern

May – Jun 2025

SmartBridge (Remote)

- Built Python and Flask applications, developed REST APIs, automated data processing workflows, and integrated backend services for scalable application development.

Machine Learning Intern

May – Jun 2024

Blackbucks (Remote)

- Performed data preprocessing, feature engineering, model training, and evaluation using Python, Pandas, NumPy, and Scikit-learn for machine learning applications.

Projects

CareerOS – AI Career Intelligence Platform [GitHub — thenameisbhagavan](#)

2025 – Present

Python, FastAPI, React.js, MongoDB

- Designed and developed an AI-powered Career Intelligence Platform featuring ATS resume analysis, GitHub intelligence, career recommendations, and interview preparation.
- Developed custom scoring engines, recommendation algorithms, and scalable REST APIs using Python, FastAPI, React.js, and MongoDB.

AuraOS – AI Assistant Platform [GitHub — thenameisbhagavan](#)

2026 – Present

Python, FastAPI, React.js, MongoDB

- Designed and developed an AI-powered assistant platform with conversational AI, document intelligence, secure authentication, and workflow automation.
- Engineered scalable backend services and real-time AI interactions using FastAPI, React.js, and MongoDB.

Smart Leave Management System [Microsoft Power Apps](#)

2026

Microsoft Power Apps, Power Automate

- Developed an automated leave management system with digital workflows, approvals, and notifications using Microsoft Power Platform.

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

AI/ML & Generative AI: Machine Learning, Deep Learning, TensorFlow, Scikit-learn, Keras, Pandas, NumPy, Computer Vision, NLP, Generative AI, Prompt Engineering, RAG, LangChain

Backend Development: FastAPI, Flask, Node.js, Express.js, REST APIs, API Integration

Frontend Development: React.js, HTML5, CSS3

Databases: MongoDB, MySQL, PostgreSQL, SQL Querying, Database Design

Tools & Platforms: Git, GitHub, Postman, Jupyter Notebook, VS Code, Vercel, Render

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Achievements

- Developed and deployed AI/ML and full-stack applications using Python, FastAPI, React.js, Node.js, MongoDB, TensorFlow, and Scikit-learn.
- Completed three industry internships across Software Development, Machine Learning, and Full Stack Engineering, gaining hands-on experience in REST APIs, backend development, and AI/ML application development.

Certifications

- Completed certifications in Python, Java, C Programming, Machine Learning, Artificial Intelligence Fundamentals, MERN Stack, React.js, MongoDB, and AWS Cloud Fundamentals from Coursera, Infosys Springboard, Google, IBM, Simplilearn, and Great Learning.
