Summary

B.Tech graduate in Artificial Intelligence Data Science with hands-on experience in Python development, backend engineering, and software development through industry internships and real-world projects. Proficient in designing and developing scalable REST APIs, backend services, and data-driven applications using Python, FastAPI, Flask, MongoDB, MySQL, and SQL. Strong foundation in Object-Oriented Programming, Data Structures Algorithms, Database Management Systems (DBMS), Operating Systems, and Computer Networks. Passionate about building scalable, secure, and production-ready backend systems that solve real-world problems.

Education

Ramachandra College of Engineering, Eluru (JNTUK)

2022 – 2026

B.Tech in Artificial Intelligence and Data Science

CGPA: 7.5/10

Internships

Software Development Intern

Jan – Apr 2025

StudyOwl Education Pvt Ltd

- Developed scalable REST APIs, authentication modules, and backend services using Node.js, Express.js, and MongoDB, following modular software engineering best practices.

Software Engineering Intern

May – Jun 2025

SmartBridge (Remote)

- Built Python and Flask applications, developed REST APIs, automated backend workflows, and integrated scalable backend services for web applications.

Machine Learning Intern

May – Jun 2024

Blackbucks (Remote)

- Developed Python-based data processing pipelines and applied data preprocessing techniques to support machine learning application development.

Projects

CareerOS – Career Intelligence Platform [GitHub](#) — [thenameisbhagavan](#)

2025 – Present

React.js, FastAPI, MongoDB, REST APIs

- Developed a full-stack career platform featuring ATS resume analysis, GitHub intelligence, career recommendations, and interview preparation.
- Built responsive user interfaces, scalable REST APIs, and backend services using React.js, FastAPI, MongoDB, and Python.

AuraOS – Intelligent Assistant Platform [GitHub](#) — [thenameisbhagavan](#)

2026 – Present

React.js, FastAPI, MongoDB

- Developed a full-stack intelligent assistant platform with authentication, document management, and workflow automation.
- Implemented responsive frontend interfaces and scalable backend services using React.js, FastAPI, MongoDB, and Python.

Smart Leave Management System [Microsoft Power Apps](#)

2026

Microsoft Power Apps, Power Automate

- Developed an automated leave management system with digital workflows, approval automation, and notification services using Microsoft Power Platform.

Technical Skills

Programming Languages: Python, Java, JavaScript, SQL

Backend Development: Python, FastAPI, Flask, Node.js, Express.js, REST APIs, API Integration

Databases: MongoDB, MySQL, PostgreSQL, SQL Querying, Database Design

Frontend Development: React.js, HTML5, CSS3

Tools & Platforms: Git, GitHub, Postman, Jupyter Notebook, VS Code, Vercel, Render

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Achievements

- Built and deployed 5+ AI/ML and full-stack projects using Python, FastAPI, React.js, Node.js, MongoDB, TensorFlow, and Scikit-learn.
- Completed three industry internships in Software Development, Machine Learning, and Full Stack Engineering, gaining hands-on experience in backend development, REST APIs, and AI-powered applications.
- Solved 180+ coding problems on LeetCode, strengthening data structures, algorithms, and problem-solving skills.

Certifications

- Completed certifications in Python, Java, C Programming, Machine Learning, Artificial Intelligence Fundamentals, MERN Stack, React.js, MongoDB, and AWS Cloud Fundamentals from Coursera, Infosys Springboard, Google, IBM, Simplilearn, and Great Learning.
